Parents who code: How to welcome your developers back after parental leave

I was excited to finally be a Mum, but I feared I was losing a hugely important part of myself

Leave for everyone

Parent or Developer?

What's new?

**We must create an environment that
de-risks taking leave**

Why Dev Leads?

Women are

26%

of the UK
tech sector
workforce

Women are

5%

of leadership
roles in the
UK tech sector

If we're waiting for mothers to rise to the top before we make meaningful change, we'll be waiting a while!

We must limit the knowledge gap created during leave and consider mental health and well-being on return

How we get it right

Step 1: Documentation

Step 2: Keep In Touch

Work up to

10

days during
parental leave

Days are paid

£££

on top of
parental pay

Step 3: Buddies

Next steps

The Maternity Pledge

Parents are choosing to work

It's OK to be behind

Thank You
